Figure 5. Numbers of recipients for the 10 selected mental disorders in 2013, by state. SOURCE: Unpublished data set provided by the SSA.

Figure 6. Percent change in rate of determinations among children in households below 200 percent of the federal poverty level, by state, from 2004 to 2013.

NOTE: The Current Population Survey table creator was used to generate numbers of children below 200 percent of the federal poverty level. Parameters used to generate the numbers include get count of: persons in poverty universe (everyone except unrelated individuals under 15); years: 2004 to 2013; Census 2010 weights; row variable: age; column variable: income-to-poverty ratio; and customized formatting: income-to-poverty ratio percent cutoff of 200 percent. SOURCES: U.S. Census Bureau, 2015; unpublished data set provided by the SSA.
