

Employment in Industry and Occupation Categories, by Level of Psychological Distress (Ages 18-64), by Respondent Race, National Health Interview Survey (2016-2018)

Note: Figure is based on 40,910 survey respondents from 2016-2018 pooled NHIS data. 121 survey respondents are dropped from our sample because information on race is not released. Non-Black respondents include those who identified themselves as White, American Indian/Alaskan Native, Asian, or Mixed Race. The occupation category of “Other” includes those whose essential industry status and feasibility for remote work are categorized as “undetermined.”
