Correction

When published online on March 2, 2015, in *Psychiatric Services* in Advance, the article by Lerner et al., "A Randomized Clinical Trial of a Telephone Depression Intervention to Reduce Employee Presenteeism and Absenteeism," should have included the following disclosure statement: "The rights to the work-focused intervention are held by Tufts Medical Center. Dr. Lerner, Dr. Adler, and Dr. Rogers are owners of Health and Productivity Sciences, a company created to advance the science and practice of health and productivity improvement, which may include licensing agreements with Tufts Medical Center for use of certain interventions." The article with the corrected statement was reposted online on April 6, 2015, and will appear in the June issue as amended.
