*Table: Binary logistic regression model with perceived necessity of the admission as the dichotomous variable with age, gender, depressive symptoms and the discipline of the interviewer as predictor variables.*

Variable	B	S.E.	Wald	df	P	Odds ratio	95% C.I.	
							Lower	Upper
Gender	.15	.51	.09	1	.77	1.16	.43	3.13
