

**Table S1. ICD-9 and ICD-10 diagnosis codes used to identify M/SUDs**

|  | <b>ICD-9 Codes</b><br>(2012 to Q3 2015)   | <b>ICD-10 Codes</b><br>(Q4 2015 to 2017)   |
|--|---|--|
| <b>Mental disorders</b>                                |   |  |
| Attention-deficit/<br>hyperactivity disorder<br>(ADHD) | 314.xx  | F90.xxx  |
| Anxiety  | 300.xx (except 300.4x)  | F40.xxx – F42.xxx, F44.xxx,<br>F45.xxx   |
| Bipolar disorder                                       | 296.0x, 296.1x, 296.4x,<br>296.5x, 296.6x, 296.7x,<br>296.8x, 300.4x                            | F30.xxx, F31.xxx   |
| Depression   | 296.2x, 296.3x, 311.xx  | F32.xxx, F33.xxx, F34.1xx  |
| Post-traumatic stress<br>disorder (PTSD)               | 309.81  | F43.1xx  |
| Schizophrenia and other<br>psychotic disorders         | 295.xx, 297.xx, 298.xx  | F20.xxx – F29.xxx  |
| Other mental disorders                                 | 296.9x, 299.xx, 301.xx,<br>302.xx, 307.xx, 308.xx,<br>309.xx (except 309.81),<br>312.xx, 313.xx | F34.xxx (except F34.1xx),<br>F39.xxx, F43.xxx, F48.xxx,<br>F50.xxx – F69.xxx, F80xxx –<br>F89.xxx, F91.xxx – F98.xxx,<br>F99.xxx |
| <b>Substance use disorders (SUD)</b>                   |   |  |
| Alcohol use disorder (AUD)                             | 303.xx, 305.0x  | F10.xxx  |
| Opioid use disorder (OUD)                              | 304.0x, 305.5x  | F11.xxx  |
| Other SUDs   | 304.1x – 304.9x, 305.1x –<br>305.4x, 305.6x – 305.9x  | F12.xxx – F19.xxx  |

**Table S2. Regression models used to produce results for Exhibit 3 panel 1A**

|                              |           |      |      |        |           |      |      |        |

**Notes.** Authors' analysis of claims data for 2012–17 from the IBM MarketScan Multi-State Medicaid Database. MH telemedicine visits had a primary diagnosis of mental disorder. Model 1 is a logistic regression model. Model 2 is a generalized linear model with gamma distribution and log link. Both models include clustered standard errors to account for multiple beneficiary-years per unique beneficiary. State fixed effects not shown to protect data contributor confidentiality.

**Table S3. Regression models used to produce results for Exhibit 3 panel 1B**

|   | Model 3.<br>No. of outpatient MH visits if any received |                         |       |         |

**Notes.** Authors' analysis of claims data for 2012–17 from the IBM MarketScan Multi-State Medicaid Database. SUD telemedicine visits had a primary diagnosis of SUD. Model 4 is a logistic regression model. Model 5 is a generalized linear model with gamma distribution and log link. Both models include clustered standard errors to account for multiple beneficiary-years per unique beneficiary. State fixed effects not shown to protect data contributor confidentiality.

**Table S5.** Regression models used to produce results for Table 2 panel 2B

| <b>N (beneficiary-years)</b>            | 663,068   |       |       |        |

**Notes.** Authors' analysis of claims data for 2012–17 from the IBM MarketScan Multi-State Medicaid Database. Outpatient SUD visits had a primary diagnosis of SUD. Model 6 is a generalized linear model with gamma distribution and log link. It includes clustered standard errors to account for multiple beneficiary-years per unique beneficiary. State fixed effects not shown to protect data contributor confidentiality.

**Notes.** Authors' analysis of claims data for 2012–17 from the IBM MarketScan Multi-State Medicaid Database. SUD telemedicine visits had a primary diagnosis of SUD. Model 9 is a logistic regression model. Model 10 is a generalized linear model with gamma distribution and log link. Both models include clustered standard errors to account for multiple beneficiary-years per unique beneficiary. State fixed effects not shown to protect data contributor confidentiality.
