Voting Simulation

[*Hand participant the card below with the following instructions*]

"I am handing you a sample voting ballot. To complete this ballot a person must place an X in the box next to the name of the candidate of his/her choice. Please show me what you would do to vote for [*candidate name; either Katherine Moore or Richard Harris*]."

```
┌─────────────────────────────────────┐
│      Governor of New York State      │
│  ─────────────────────────────────   │
│                                       │
│   To vote, please place an X in the box │
│    next to the candidate of your choice. │
│                                       │
│                                       │
│   Katherine Moore              ┌───┐  │
│   Republican Candidate         │   │  │
│                                └───┘  │
│   Richard Harris               ┌───┐  │
│   Democratic Candidate         │   │  │
│                                └───┘  │
└─────────────────────────────────────┘
```

[*Score of 2: Places an "X" in the box next to the name of the correct candidate. Score of 1: Identifies correct candidate, but places a mark outside the box or an incorrect mark in the box. Score of 0: Fails to identify and mark the correct candidate.*]
