## Psychiatric Services in Advance

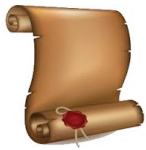

### Latest research reports!

#### **Brief Critical Time Intervention Reduces Rehospitalization**

A brief, three-month focus on coordination of services after hospital discharge greatly improved the "revolving door" phenomenon of frequent rehospitalization for 149 psychiatric patients in a managed behavioral health care organization.

#### **Gender Differences Among Veterans in Jail Diversion Programs**

Male and female veterans involved in jail diversion programs report unique life experiences that should be addressed by mental health services. In particular, women reported significantly higher rates of sexual assault and men reported greater substance abuse.
