

**Study design:
adapted RAM**

Process:

Product:

Step 1:
Delphi
(expert panel n = 7)

**18
Vignette variables**

Step 2:
Generate orthogonal
design
Construction of 64
vignettes and socio-
demographic list

64 vignettes

Step 3:
Data collection

Dataset

Step 4:
GLM Analysis
-18 vignette
variables
-11 rater
characteristics

Model :
12 main explicators:
-seven vignette
-five rater
-interaction effect
